

PureGreen24, is recognized by Wildlife Organizations as a Preferred Disinfectant

New York, NY June 16, 2008 – PureGreen LLC, today announced that PureGreen24 has been selected as a preferred disinfection agent in a protocol developed to minimize the potential for transmission of white-nose syndrome (WNS) while handling bats.

<http://www.fws.gov/northeast/pdf/SummerGuidelines042408.pdf>

Hibernating bats are dying by the tens of thousands in the northeastern United States, and a growing circle of top scientists are anxiously trying to figure out why. The mystery affliction, reported in New York, Vermont and Massachusetts, is dubbed “white-nose syndrome” (WNS) because many affected bats had visible halos of white fungus around their faces. Bat experts fear the White Nose Syndrome may spell doom for several species that keep insect pests under control in the US.

A disinfection protocol to reduce the potential spread of WNS while performing research in bat habitats was developed by the U.S. Fish and Wildlife Service, in cooperation with other wildlife agencies and scientists, and is designed for use by researchers throughout the country who are coming in contact with bats. In order to easily implement these protocols in the field, the disinfecting agents used must be rapidly effective and require no rinsing. PureGreen24 meets these criteria.

PureGreen,LLC has donated PureGreen24 disinfectant to the NYS Biodiversity Research Institute www.nysm.nysed.gov/bri/ to help in the research of this serious threat to North American bats.

David L. Stetson, co-founder of Pure Green, LLC, commented, "We are proud to have PureGreen24(TM) recognized by the US Fish and Wild life Service, and we are pleased to support the research efforts of NYS Biodiversity Research Institute."

About Pure Green, LLC

Pure Green, LLC is the international distributor of PureGreen24 disinfectant and deodorizer. PureGreen24 is the first “green” disinfectant registered by the Federal EPA; your only choice for a proven “green” disinfectant. Pure Green, LLC is dedicated to reducing health risks caused by exposure to viruses, fungi and bacteria without endangering humans and animals during the disinfecting process. PureGreen24 kills MRSA, VRE and Staph, yet also kills common household germs and is safe for use in the presence of children and animals. PureGreen24 is based on a patented Silver Ion SDC® technology that is a true “green” disinfectant with unprecedented 24 hour effectiveness. Pure Green, LLC is further distinguished by donating 10% of profits to charities which support children’s health, cancer research and animal protection. Additional information about Pure Green, LLC is available at www.puregreen24.com.
