

## **PureGreen24 is added to EPA list Disinfectants for Use Against SARS-CoV-2 based on its efficacy against the Human Coronavirus.**

New York, NY March 16, 2020

Pure Green LLC, distributor of PureGreen24, Disinfectant and Deodorizer, provides an update and information on Coronavirus outbreak.

*PureGreen24 EPA Reg. No.72977-3-84634 has been added to EPA's List N: Disinfectants for Use Against SARS-CoV-2 based on its efficacy against the Human Coronavirus.*

*PureGreen24 is identified on the EPA & CDC list via the product name "AXEN 30" EPA registration number 72977.*

*This list includes products with emerging viral pathogen claims and those with human coronavirus claims. If a product with an emerging viral pathogen claim is not available, use a product with a coronavirus claim. If the product is listed as "N" under the Emerging Viral Pathogen Claim column, then it has a human coronavirus claim.*

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

*PureGreen24 is an EPA category IV disinfectant.*

*In addition, PureGreen24 does not contain any of the 19 newly banned FDA chemicals.*

### **What is Coronavirus**

According to the World Health Organization, Coronaviruses (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV).

### **2019 Novel Coronavirus (2019-nCoV)**

The 2019 Novel Coronavirus (2019-nCoV) is a new strain of coronavirus that was first identified during an investigation into an outbreak in Wuhan, China. How easily a virus spreads person-to-person can vary- some viruses can be highly contagious, while other viruses are less so. While investigations are ongoing to better understand the transmissibility, severity, and other features associated with 2019-nCoV, person-to-person spread has proven to occur.

A new analysis looking at data from different types of coronavirus has shown that many strains can live on surfaces such as glass, plastic or metal, for up to nine days.

## How Coronavirus is Spread

The CDC states that coronaviruses most commonly spread from an infected person to others through:

- The air by coughing and sneezing
- Close personal contact, such as touching or shaking hands
- Touching an object or surface with the virus on it, then touching your mouth, nose, or eyes before washing your hands

## Protection from the Coronavirus

The best way to protect yourself is to avoid being exposed to the virus. The CDC always recommends simple everyday preventative steps to help prevent the spread of respiratory viruses, including:

- Avoid close contact with people who are sick
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Wash your hands often with soap and water for at least 20 seconds.
- If soap and water are not available, use an alcohol-based hand sanitizer
- ***Clean and disinfect frequently touched objects and surfaces***
- Stay home when you are sick
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash

PureGreen24 is EPA registered to kill human Coronavirus and has demonstrated effectiveness against viruses similar to **2019 Novel Coronavirus (2019-nCoV)** on hard, **non-porous surfaces** when used in accordance with the directions for use.
