APPLICATION INSTRUCTIONS (Cont.)

When used as directed, PureGreen24 provides residual protection from Pseudomonas aeruginosa, Staphylococcus aureus and Salmonella enterica up to 24 hours after initial application. Do not contact treated surface after application if residual protection is to be maintained.

Fungus Control: For effective control of the fungus *Trichophyton mentagrophytes*, the surface must be completely wet with **PureGreen24** for 10 minutes. The surface may then be wiped dry with a clean towel. Re-apply when cleaning or when new growth appears.

*Viral Control: To kill Herpes Simplex Type 1, Rotavirus, Human Coronavirus, Norovirus, Avian Influenza A, Influenza A Virus, Rhinovirus and Polio Virus Type 2 the surface must be completely wet with PureGreen24 1- 10 minutes. Refer to Kill Time Chart The surface may then be wiped dry with a clean towel.

Kills HIV-1 on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings (or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of HIV: Instructions for Cleaning and Decontamination Against HIV on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids: Personal Protection: When handling items soiled with blood or body fluids, use appropriate barrier protection such as latex gloves, gowns, masks and eye coverings. Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this disinfectant. Contact Time: Apply PureGreen24 to area to be treated. The surface must be completely wet with PureGreen24 for 30 seconds. The surface may then be wiped dry with a clean towel. This contact time will not control all organisms listed on this label. Refer to application instructions for other organisms. Disposal of Infectious Materials: Blood and other body fluids should be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the human body, either into or in contact with the bloodstream, or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

STORAGE AND DISPOSAL: Storage: Do not contaminate water, food or feed by storage or disposal. Pesticide Disposal: Nonrefillable Container. If Empty: Place in trash or offer for recycling if available. Do not reuse container. Rinse thoroughly before discarding in trash or recycling.

IN CASE OF EMERGENCY: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact CHEMTREC 1-800-424-9300 for emergency medical treatment information.
