

## **PureGreen24 is effective against Hantavirus**

New York, NY May 21, 2026

Pure Green LLC, distributor of PureGreen24, announces that PureGreen24 is listed on the Emerging Viral Pathogens (EVPs) List Q and is expected to be effective against Hantavirus.

Pure Green 24 (EPA Reg. No 72977-3-84364) is listed on EPA's List Q: Disinfectants for Emerging Viral Pathogens (EVPs). Based on the EPA evaluation criteria, Pure Green 24 is expected to kill Hantavirus when used as directed against Rhinovirus or Norovirus. Our product is listed under the primary registration, (EPA Reg No. 72977-3), Axen 30 is our chemical product name.

### [EPA Emerging Pathogens Q list](#)

PureGreen24 has demonstrated effectiveness against viruses similar to Hantavirus on hard, non-porous surfaces. Therefore, PureGreen24 can be used against Hantavirus when used in accordance with the directions for use against Rhinovirus or Norovirus on hard non-porous surfaces. Refer to the CDC website at <https://www.cdc.gov/hantavirus/about/index.html> for additional information.

PureGreen24 is an EPA category IV disinfectant.  
In addition, PureGreen24 does not contain any of the 19 banned FDA chemicals.
